Time Stamp Server

The solution we propose begins with a timestamp server. A timestamp server works by taking a sequence of blocks of time to be timestamped and widely publishing their hash, such as in the Blockchain or Bitcoin [25]. The timestamp server for the data we have created at the beginning of the process is shown in Figure 2. The timestamp server maintains a timestamp chain, forming a chain, with each additional timestamp reinforcing the ones before it.

## THE GREAT CONJUNCTION IN AQUARIUS

**HERALDING THE NEW AGE**  
On December 2020, Jupiter and Saturn unite in the sign of Aquarius, forming a configuration called a Great Conjunction which only happens once every twenty years. Great Conjunctions are often longterm beginnings or foundations formed out of unstable circumstances. In the sign of AQUARIUS, this is likely to mark a major technological boom that will culminate on 2030 and last until 2040, the next Great Conjunction.

Over the next ten years, we are going to see our world innovate unlike never before, particularly in the fields of AI, technology, science, space travel, UFOs, networks, and the Internet. Major Universal truths will also be revealed as we welcome the New Age of Aquarius. The old world will soon come to an end, paving way to the new order of things.
